

Hydro-Chromatic Tech Data Sheet (TDS)

- Visually identifies saturation and alerts when to change
 - Breathable and flexible
- Eliminates the need to lift dressing and inspect for saturation
 - Produced at 58" wide master rolls
 - Patented and patents pending

T1 Indicator

White Translucent Nonwoven

Blue Non-Adherent Apertured Film

BENEFITS OF INDICATOR TYPE 1

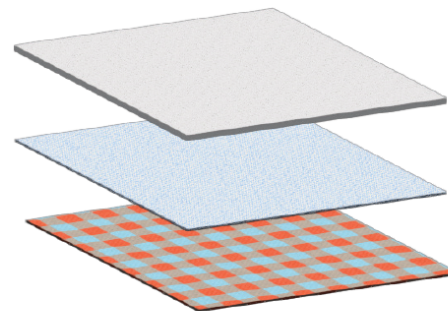

- Suitable as a wound contact material
- Thin, yet provides fluid-holding capacity
- Suitable by itself or for use with foam and absorbent

T2 Indicator

White Translucent Nonwoven

Tie Layer

Printed Nonwoven

BENEFITS OF INDICATOR TYPE 2

- Printed technology offers custom colors, patterns, wording, and more
- Designed for use with foam and absorbent layers
